## Resellers Online

It's all about communication, promoting your company, staying abreast of the latest news, reaching out and being reached by others. It's the newest, most amazing and effective form of communication embraced by the world. It's the Internet.

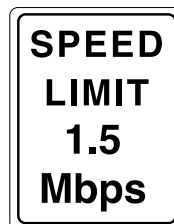

DCI is installing a full-time Internet connection, to be operational by mid-April. Once installation is complete, construction of DCI's site will commence and progress in stages. DCI will use this connection to provide customers with access to the latest marketing information, technical news and software distribution libraries.

In addition, DCI wants to provide your company with Internet exposure, for *free*. Why? Because DCI partners with its Resellers -- to find business opportunities and solutions. If your company has a Web Page, DCI would like to link to it. If you don't have a page yet, DCI will build one for you.

A mailing was sent to Resellers on March 15, requesting information so that DCI may publish a page or a link for your company. If you'd like to confirm who at your company received the mailing, contact Barbara at DCI.

DCI's FTP site is under construction, during which time, we have placed a mirror image of our uucp public distribution directories for downloading. Please feel free to visit our site at *ftp.dynamic.com* the next time you need to download software. Send email to the address below with any comments or questions you have regarding this site.

DCI's dedicated, superfast connection will allow electronic traffic to travel at speeds up to 1.5 megabits per second!

DCI's website will progress in stages over the coming months. Eventually, information such as Release Notes, Tech Briefs and product manuals will be at your finger tips.

Reseller pages and links will be created and published in stages as well. We think that you'll be pleased with the results. Later, if you decide to expand your page or construct a full Internet site, DCI will help you.
